Biographical Note:

Dr. Arun Majumdar is the inaugural Dean of the Stanford Doerr School of Sustainability and the Jay Precourt Provostial Chair Professor at Stanford University, with appointments in Mechanical Engineering, Energy Science and Engineering, and Photon Science at SLAC. He is a Senior Fellow and former Director of the Precourt Institute for Energy, and a Senior Fellow of the Woods Institute for the Environment and, by courtesy, the Hoover Institution.

Nominated by President Obama and confirmed by the U.S. Senate, he was the founding Director of the Advanced Research Projects Agency–Energy (ARPA-E) from 2009 to 2012, building it into a model of government innovation with bipartisan support. He also served as Acting Under Secretary of Energy and Senior Advisor to Secretary Steven Chu, and was part of the science team that helped stop the Deepwater Horizon oil spill. He later chaired the U.S. Secretary of Energy Advisory Board under Secretary Jennifer Granholm, was its Vice Chair under Secretary Ernest Moniz, and served as a U.S. Science Envoy. Before joining Stanford, he was Vice President for Energy at Google.

Dr. Majumdar is a member of the U.S. National Academy of Sciences, the National Academy of Engineering, the American Academy of Arts and Sciences and the Indian National Academy of Engineering. He received his bachelor's degree in mechanical engineering from IIT Bombay and his Ph.D. from UC Berkeley.
